

FOR IMMEDIATE RELEASE

**Co-nexus, Inc. Announces Dealership Agreement
With CCC Technologies, Inc.**

Houston, TX, August 21, 2008 — Co-nexus, Inc. announces that CCC Technologies, Inc. has become an authorized distributor of the Co-nexus product line of recording and quality monitoring solutions. Under the terms of the dealership agreement CCC will be promoting and implementing the entire line of CXM modules to its customers and prospects across the US.

The Co-nexus' CXM Recording and Quality Monitoring application is utilized by organizations to automatically record agent-customer interactions. Call recording has become an important component of many businesses technology infrastructure to verify compliance with government regulations and industry requirements. Additionally, many businesses utilize recording technologies for quality monitoring and to improve customer satisfaction and retention. The Co-nexus CXM application includes advanced software for agent performance evaluation, agent coaching and customer satisfaction surveys.

“Our relationship with CCC Technologies is a tremendous boost to our distribution efforts,” said Brian Daily, Co-nexus VP of Marketing. “CCC Technologies has a proven track record of delivering quality and innovative technology solutions over the past 24 years. Further, their commitment to excellent customer service and nationwide distribution will create many opportunities to introduce CXM to their existing base of satisfied customers as well as new opportunities across the US.”

“Adding the Co-nexus CXM application to our portfolio enables our team of technology specialists to offer our customers a true recording and quality monitoring solution specifically designed for the mid-sized contact center,” said Jim Poull, Vice President of Sales and Marketing. “After evaluating the CXM application we believe it offer all of the features required of or mid-sized customers at an economical price point.”

About Co-nexus, Inc.
